Born: February 14, 1991 – Quincy, MA
Nationality: American

Summary

I am a recent graduate of McGill University passionate about engineering design, specifically robotics and human computer interaction. I am currently looking for full time employment.

Education

2009 - 2014 **B.Eng., Mechanical Engineering**
McGill University – Montreal, Quebec

Relevant Experience

- 8/2013 - 8/2014 **Co-Founder & Mechanical Engineering Lead**
McGill Robotics – A.U.V. Design Team – Montreal, Quebec
3rd place static, 10th place overall – AUVSI International RoboSub Competition in San Diego
Judges Award – Best Branding and Business Development (\$500)
- Created and implemented a comprehensive structure, brand, environment, and management system from scratch for a student organization with 98 members
 - Lead all mechanical design, manufacturing and testing for the team of 60 creating an autonomous underwater vehicle
 - Delegated work to and solved problems with 16 members of the mechanical division
 - Designed the vehicle assembly with Inventor for FEA, dynamic modeling, 3D printing, machine drawings and simulations
- 9/2013 - 7/2014 **Development of a Variable-Friction Shoe-Surface Mechanism**
Interdisciplinary Design Project – Montreal, Quebec
Independent 7-month design & manufacturing project
Supervised by Professor Jeremy Cooperstock, *McGill Centre for Intelligent Machines*
- Created from scratch a mechanism to fit in the sole of a shoe and dynamically simulate the friction of a full range of surfaces
 - Designed the mechanical, electrical and software systems using Autodesk Inventor and Arduino
 - Manufactured complete functioning prototype of mechanism to 0.05mm tolerances using conventional milling & turning, CNCing, and welding
 - Implemented a PD controller to actuate two compact braking pads using a stepper motor, gear system, and lead screws
 - Verified full functionality through a series of static and kinetic friction tests

9/2013 - 5/2014

Development of the Propulsion & Control System for an A.U.V.

Mechanical Engineering Senior Capstone Project – Montreal, Quebec

Collaborative 7-month design & implementation project

Client: McGill Robotics | Supervisor: Professor Meyer Nahon

- Designed a 5-DOF propulsion & control system using C++ and ROS
- Arranged 6 thrusters around the COG for surge, sway, heave, pitch, and yaw control
- Simulated the controls with dummy sensor data in a 3D environment within Gazebo
- Implemented the system by interfacing with the autonomous planner, computer vision and motor control
- Created test platforms and wet-tested the full system in a pool, for both tethered and autonomous missions

Summer 2013

Control Systems & Engineering Internship

T. Davlin Glass – Cambridge, Massachusetts

Designer gold-leaf glass tiles and glass products

- Designed, manufactured, and wired systems to control the temperature of custom-built, high-powered glass kilns
- Aided in the design and construction of additional kilns

8/2012 - 8/2013

Material Collection System Leader | Marketing & Media Director

McGill LunarEx Robotics Design Team – Montreal, Quebec

12th place out of 50 international teams at NASA's Lunabotics Mining Competition – Orlando, Florida

Supervised by Professor Peter Henry Radziszewski

- Member of a team of 40 students creating an autonomous mining lunar robot
- Lead the efforts of a five person group responsible for designing, constructing and assembling the mechanism that collects and dumps lunar regolith simulant
- Brought original concepts to realization through sketching, CADing, machining, assembly, and testing
- Machined & CNCed aluminum, molded composites, 3D printed new materials, and fabricated sheet metal parts
- Developed rebranding strategies to increase interest and team credibility
- Enhanced project marketing and sponsorship visibility through media exposure
- Documented each step of the design process, meetings, outreach, and competition with my photography
- Shot, directed and edited a promotional film that was sent to all sponsors and shared on social media outlets

Summer 2012 &
Summer 2013

Engineering Internship

Robies Heating & Cooling HVAC – Hyannis, Massachusetts

- Developed and implemented automated programs for generating project estimates
- Calculated thermal loads
- Developed a work flow and integrated inventory management system
- Recorded and analyzed inside climate data
- Provided company-wide technical support
- Prepared reports for clients and staff
- Analyzed sales trends and provided detailed reports

1/2013 - 8/2013

Front End & Usability Lead

Braille University iPhone Application – Montreal, Quebec

Tool to aid in teaching Braille to blind children using an electronic medium

Supervised by Professor Jeremy Cooperstock, *McGill Center for Intelligent Machines*

- Created a mobile application focusing on usability and the user interface
- Using a user-centered design approach, created prototypes, conducted user-tests, and coded the application to be easy to use, even without the use of vision
- Collaborated with Braille education professionals to create an authentic curriculum and legitimate learning tool (Anne Jarry, Nathalie Martiniello: *Univerisite de Montreal*)

Software & Programming Skills

Computer Aided Design: *Inventor, Solidworks, AutoCAD*

Data Analysis: *MATLAB, Excel*

Programming Languages: *Python, C, C++, Objective-C, ROS*

Version Control Systems: *Git, Autodesk 360*

Web Development: *HTML5, CSS, Markdown, Jekyll, Google Analytics, SEO*

Digital Typesetting: *LaTeX, XeLaTeX*

Media & Graphics: *Illustrator, Lightroom, Photoshop, InDesign, Final Cut Pro*

Activities & Interests

2010 - Present

Photography - www.michaelleliotphotography.com

2009 - 2014

McGill University Intramural Ultimate Frisbee (1st Place 2010, 2011)

2012 - 2013

Photo Contributor - [The McGill Tribune](#)

2011 - 2012

McGill Engineering Undergraduate Society Website Committee

2010 - 2011

McGill University International Student BUDDY Mentor Program
